

SADDLE JUNCTION & WALLGATE JUNCTION WIGAN

Upgrading the existing Saddle Junction and Wallgate Junction in a very busy town centre area of Wigan.

CLIENT
WIGAN COUNCIL

VALUE
£1.2M

CONTRACT NO.
C995

The works involved upgrading existing highway junctions and the construction of dedicated segregated cycle facilities. The scheme involved: major traffic management; installation of new kerbing and tactile paving; footway and carriageway construction and resurfacing; installation of new traffic signals and associated ducting and infrastructure including the provision of low-level cycle signals; installation of carriageway drainage; provision of new traffic signs and road markings. Extensive Public Relations Liaison with affected third-party stakeholders and the travelling public in conjunction with the client's Communications/Public Relations Team.
