

WARWICK WARWICKSHIRE

An example of the very small projects we occasionally undertake.

PROCESS
TUBULAR STEEL DRIVEN PILING

DURATION
1 DAY

VALUE
£9,000

On occasion we are tasked with very small projects, and in these cases we always ensure these are done to the same high standard as even our largest projects.

In this instance we were asked to pile the totem pole to a popular fast food restaurant in Warwick. The access here was tight as the totem was to be installed in the entrance way of a supermarket complex housing the restaurant.

Nonetheless we managed to unload the rig and piles, install the necessary piles and mobilise off site all in the space of a day.

It was one of our quickest jobs, and, although nowhere near our biggest still one we are very proud of.

Although, unfortunately, no free burgers!
